PROFESSIONAL SUMMARY

Innovative and strategic AI leader with over eight years of experience in cloud development and a strong focus on AI technologies and their implications in media. Proven track record of collaborating with product and technological teams to develop AI-driven solutions that enhance editorial workflows and consumer-facing products. Experienced in multi-agent orchestration and extensive computing systems, with a deep understanding of data analysis, machine learning applications, and consumer product development in a media context. Adept at communicating complex AI concepts to non-technical stakeholders and advocating for responsible AI usage. Holds a strong background in editorial operations and leadership, bridging journalistic principles with AI solutions to drive innovation.

EXPERIENCE

Global Cloud Inc.	Seattle, WA
Senior Software Development Engineer - Elastic Infra Platform	2021.06–Present
<i>Led cross-functional teams to innovate AI-driven infrastructure solutions, enhancing global media technology operations.</i>	
<ul style="list-style-type: none">Architected AI-enhanced batch compute systems, achieving 99.99% update coverage and preventing major outages.Pioneered AI-driven enhancements in LLMs for improved reasoning, supporting advanced editorial technology solutions.Spearheaded data warehouse initiatives for global visibility, facilitating strategic decision-making in media contexts.	
Global Cloud Inc.	Seattle, WA
Software Development Engineer II - Core Infra Platform	2019.05–2021.05
<i>Developed AI-driven orchestration systems, optimizing rollout processes across extensive media technology infrastructures.</i>	
<ul style="list-style-type: none">Identified key metrics for AI-based rollout analysis, saving over \$2M and enhancing media technology reliability.Innovated alert systems reducing detection time, ensuring 99.9% SLA uptime in media operations.Refined algorithms to improve rollout efficiency by 30%, directly impacting consumer media product delivery.	
TechCorp LLC	San Francisco, CA
Software Engineer	2016.11–2019.03
<i>Led AI and ML infrastructure projects to enhance data-driven media solutions and consumer product integration.</i>	
<ul style="list-style-type: none">Migrated ML infrastructure to AWS, achieving 99.9% availability for media recommendation services.Designed distributed systems for seamless enterprise integration, optimizing media data workflows.Implemented cost-saving caching solutions, reducing cloud expenses and enhancing media data security.	
HealthData Systems	Chicago, IL
Software Engineer	2015.09–2016.11

Engineered cloud-based solutions for data management, supporting robust media content delivery systems.

- Designed high-durability data placement services, ensuring 99.9999% data protection for media archives.
- Developed efficient data management tools, optimizing storage and retrieval in media content systems.

EDUCATION

Notecnirp University City, State
M.S. in Computer Science 2015.06

Focused on AI technologies and machine learning applications, with coursework in Data Science and AI ethics.

Completed a capstone project on AI-driven solutions for media content analysis, enhancing editorial workflows.

Collaborated with cross-functional teams on projects integrating AI into consumer product development.

Jiangning University City, State
B.S. in Computer Science 2012.06

Studied foundational courses in data analysis and machine learning, relevant to media applications.

Participated in a research project exploring the implications of AI technologies in media contexts.

Graduated with honors, demonstrating strong analytical and problem-solving skills.

SKILLS

Technical Skills: AI technologies, Data analysis, Machine learning applications, Consumer product development, Large Scale Distributed Systems, LLM Orchestration, Python, SQL

Soft Skills: Leadership, Strategic mindset, Cross-functional collaboration, Communication of complex concepts, Advocacy for AI ethics

Other Skills: Collaboration with product and technological teams, Understanding of editorial operations, Decision-making, Organization
